RESEARCH INTERESTS

I focus on designing fundamental *Machine Learning* algorithms with strong empirical performance & real-world deployability geared towards enabling **adaptive intelligence**. They have been widely adopted by industry serving over a Billion users daily and open-source communities. My research is used extensively across Google – Gemini (2.0 for AI Overviews, 1.5 Flash/Flash-8B/Nano), Gemma 3n, Gemini Embeddings, Search Representations, Ads Models and GenMedia Models. It has also been widely deployed across industry (most dense embeddings) and open source (~10% Hugging Face downloads).
